Event Brochure

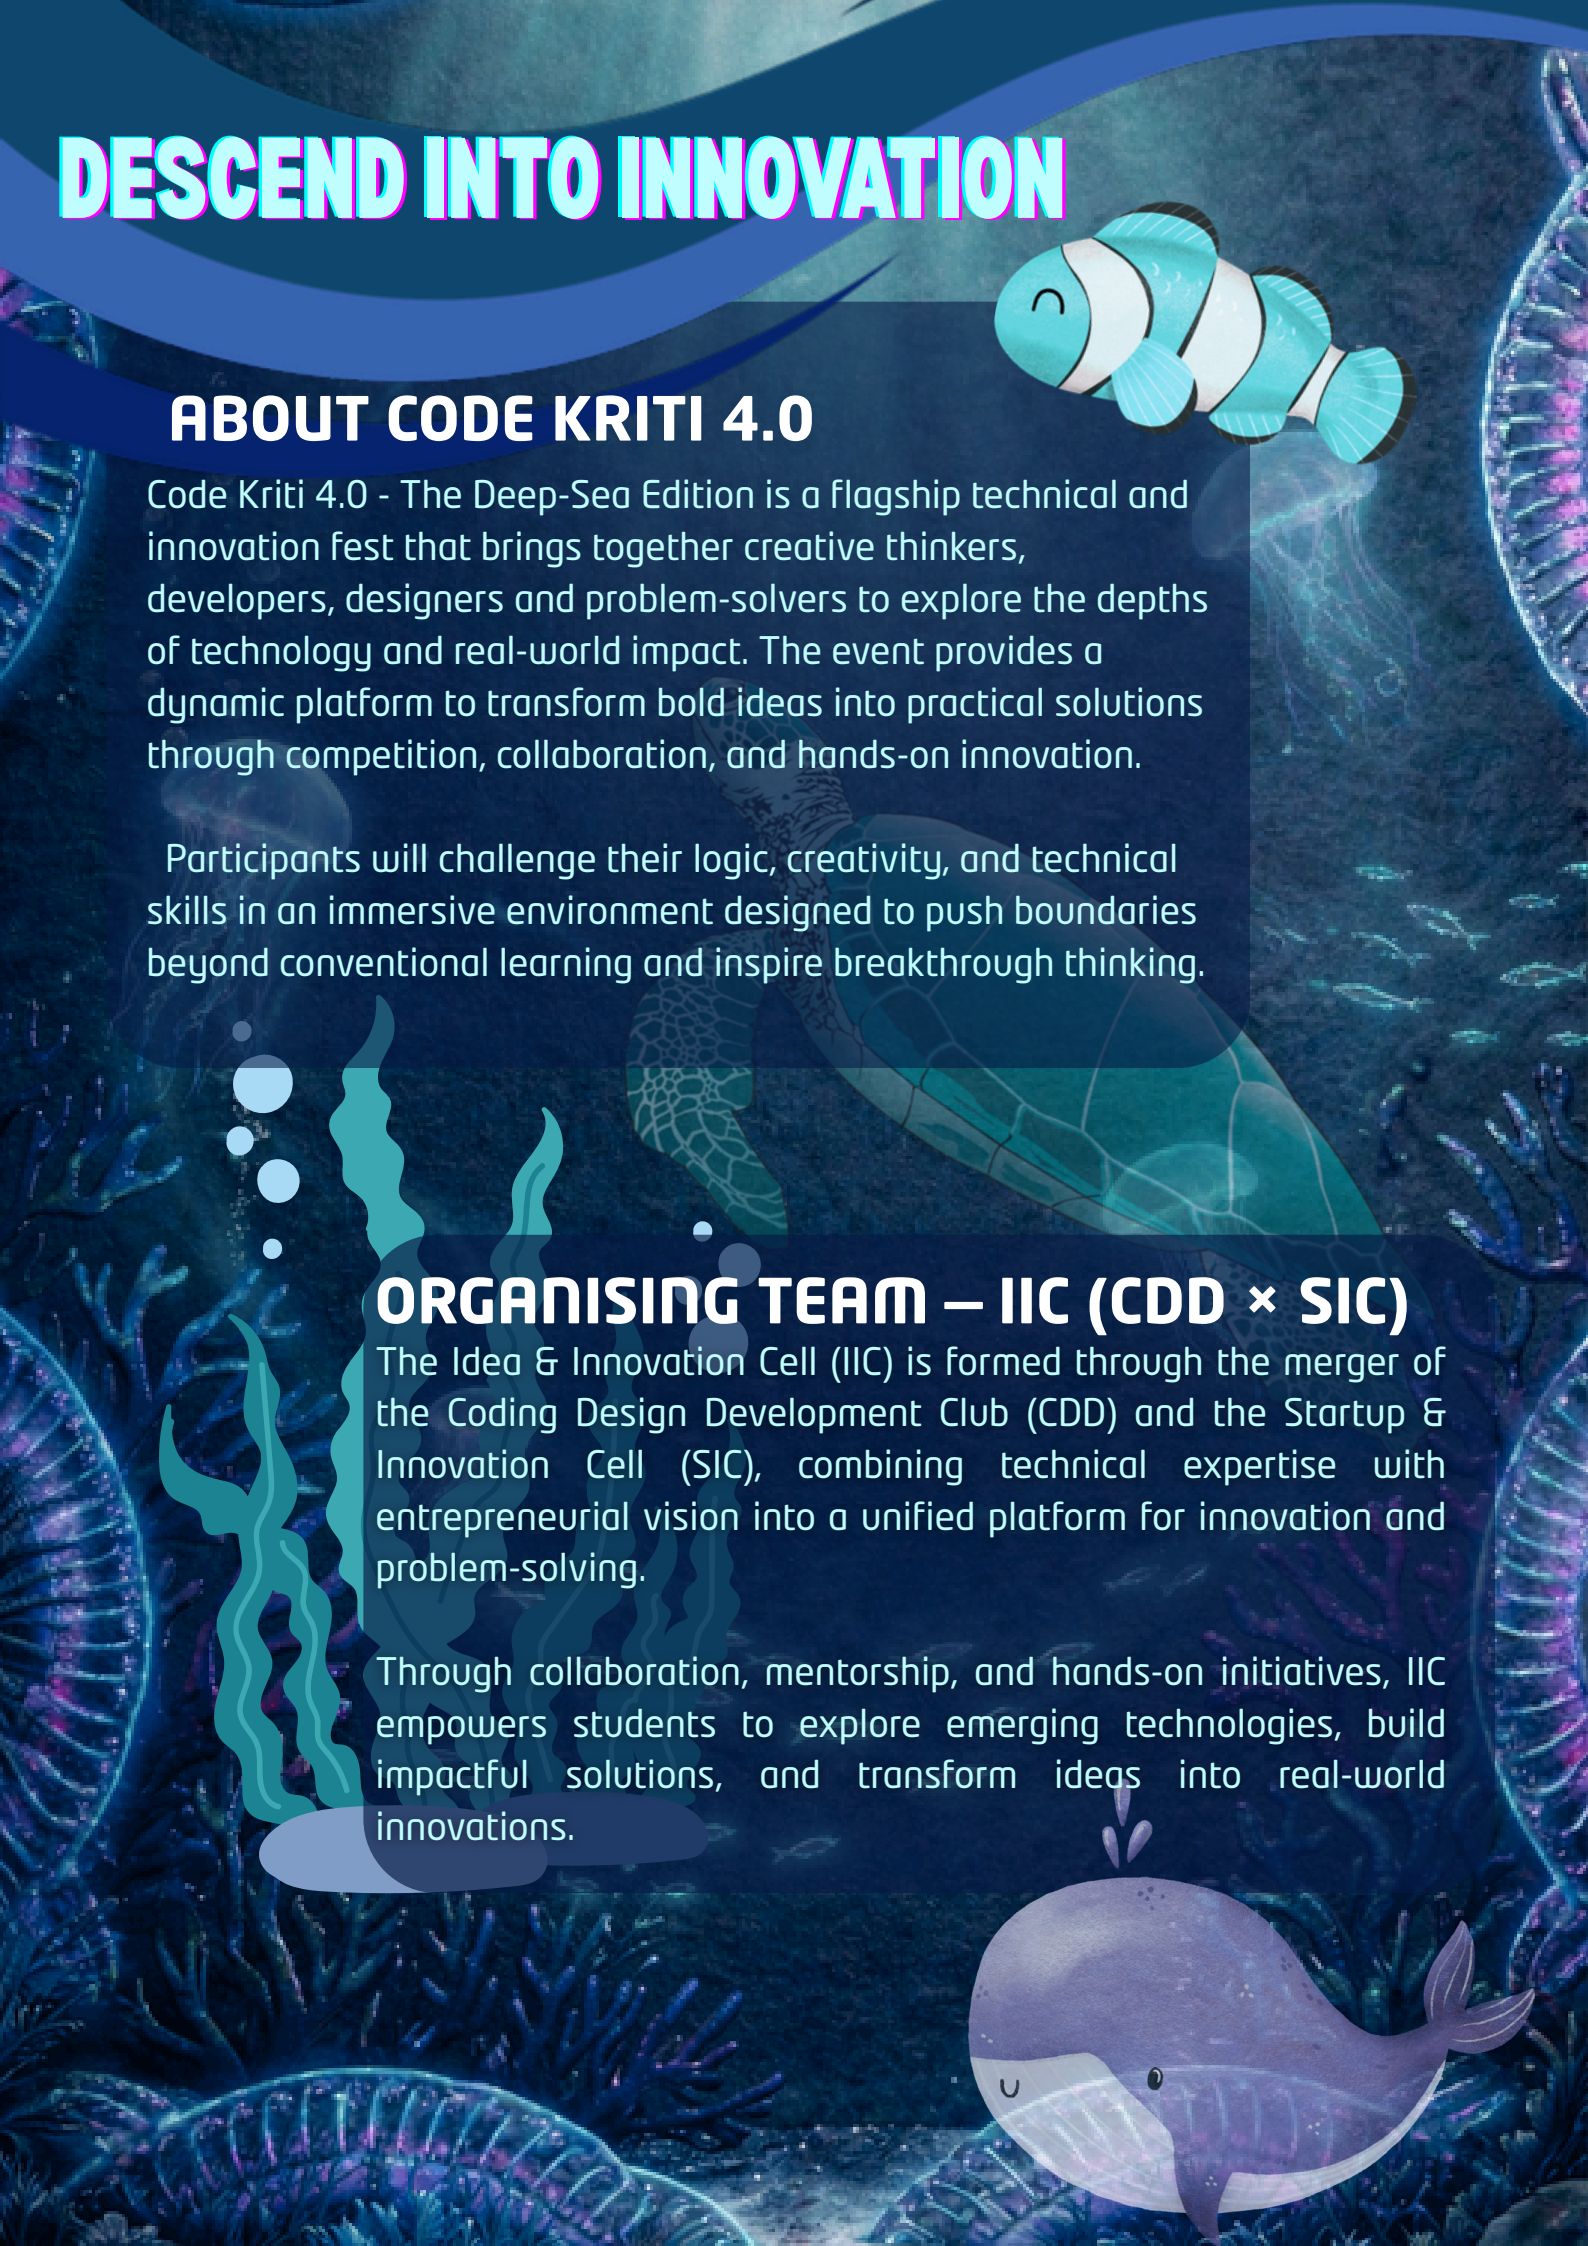

THE DEEP-SEA EDITION CODE KRITI

DIVE INTO THE DIGITAL DEPTHS

6TH MARCH - 7TH MARCH
2K26

*BEYOND THE DIGITAL HORIZON: WHERE
DEEP IDEAS BECOME REALITY*

DESCEND INTO INNOVATION

ABOUT CODE KRITI 4.0

Code Kriti 4.0 - The Deep-Sea Edition is a flagship technical and innovation fest that brings together creative thinkers, developers, designers and problem-solvers to explore the depths of technology and real-world impact. The event provides a dynamic platform to transform bold ideas into practical solutions through competition, collaboration, and hands-on innovation.

Participants will challenge their logic, creativity, and technical skills in an immersive environment designed to push boundaries beyond conventional learning and inspire breakthrough thinking.

ORGANISING TEAM – IIC (CDD × SIC)

The Idea & Innovation Cell (IIC) is formed through the merger of the Coding Design Development Club (CDD) and the Startup & Innovation Cell (SIC), combining technical expertise with entrepreneurial vision into a unified platform for innovation and problem-solving.

Through collaboration, mentorship, and hands-on initiatives, IIC empowers students to explore emerging technologies, build impactful solutions, and transform ideas into real-world innovations.

Innovation Challenge Idea Pitch (Intra-College)

DATE: 6TH MARCH

Dive into the depths of creativity and strategic thinking in this idea-driven innovation arena. The Ideathon challenges participants to transform raw concepts into structured, impactful solutions, where imagination meets practicality beneath the surface of real-world problems. Participants must identify a clear problem statement, propose an innovative solution, and present their idea with logical clarity and feasibility. The focus lies not just on creativity, but on structured thinking, relevance, and real-world applicability.

- **Format:** Present a well-defined problem statement along with a proposed innovative solution.
- **Rounds:** Qualifier (Short Pitch) and Final (Detailed Presentation & Q&A).
- **Team Size:** 2 members per team.
- **Entry Fee:** ₹60/- per participant.
- **Evaluation:** Problem understanding, originality of idea, feasibility, clarity of presentation, and practical impact.

CODING, DESIGN AND DEVELOPMENT CLUB
PARALA MAHARAJA ENGINEERING COLLEGE

Algo-to-Code

DATE: 6TH MARCH

Dive solo into the depths of logic and precision in this individual coding expedition. Algorithm-to-Code tests your ability to transform structured thought into functional execution, where clarity meets control beneath the digital waves.

Participants must decode given algorithms or pseudocode and convert them into fully executable programs, navigating carefully through the currents of syntax and structure

Evaluation Criteria

Your code will be examined beneath the surface for:

- Accuracy of translation from logic to execution
- Strict adherence to syntax and best practices
- Efficiency in approach
- Readability and clean structuring of code

Eligibility: PMEC undergraduate students

FORMAT: CONVERT ALGORITHMS/PSEUDOCODE
INTO EXECUTABLE CODE

ENTRY FEE: ₹30/- PER INDIVIDUAL

CODING, DESIGN AND DEVELOPMENT CLUB
PARALA MAHARAJA ENGINEERING COLLEGE

DESIGNATHON

DATE: 7TH MARCH

A UI/UX design competition where participants create a complete design solution for a given project prototype. Participants have full creative freedom to choose their own theme,color scheme, and design style.

Rules:

- **Starting Point:** Participants begin from Solving the problem statements .
- **Tools:** Any AI or UI/UX design tool (e.g., Figma, Adobe XD, Sketch, Penpot, canva) is allowed / Proper Frontend
- Each participant gets 10-15 minutes for evaluation

Entry Fee: ₹60 per participant.

Date:7th March

TECH MAZE

DATE: 7TH MARCH

Descend into the currents of logic, speed, and memory in this thrilling team-based expedition. Tech Maze is a multi-layered deep-sea challenge designed to test your analytical depth, coding instincts, and sharp recall under pressure

Structure:

- **Round 1 (Byte Bash):** Rapid-fire tech trivia followed by a memory quiz.
- **Round 2 (Sort the Stash):** Arrange jumbled code snippets into a working block. Evaluated on control flow, syntax, and semantic accuracy.
- **Round 3 (Code Bee):** A tricky code is displayed; the first team to state the correct output wins.

Team Size: 2-3 members per team.

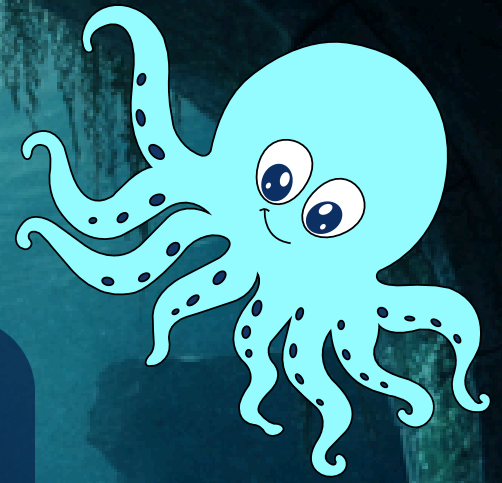

Entry Fee: ₹90/- per team.

DEVXTREME - THE DEEP INNOVATION DIVE

(Hackathon)

DATE: 7TH MARCH

All teams begin their journey by uploading the :
The problem statement
The proposed idea and solution approach
Only the most promising concepts rise from this initial depth to advance further.

Tracks:

- **Agriculture**
- **Fintech**
- **Edutech**
- **Healthcare**
- **Cybersecurity**
- **Open Innovation**

The Innovation Currents - Round Structure
Qualified teams navigate through three intense layers of evaluation:

Round 1 - Ideation

Refine and articulate your concept with clarity and depth.

Round 2 - Development

Transform your vision into a working prototype beneath the pressure of time and precision.

Round 3 - Pitching & Evaluation

Present your solution to the panel and defend it through an interactive Q&A dive.

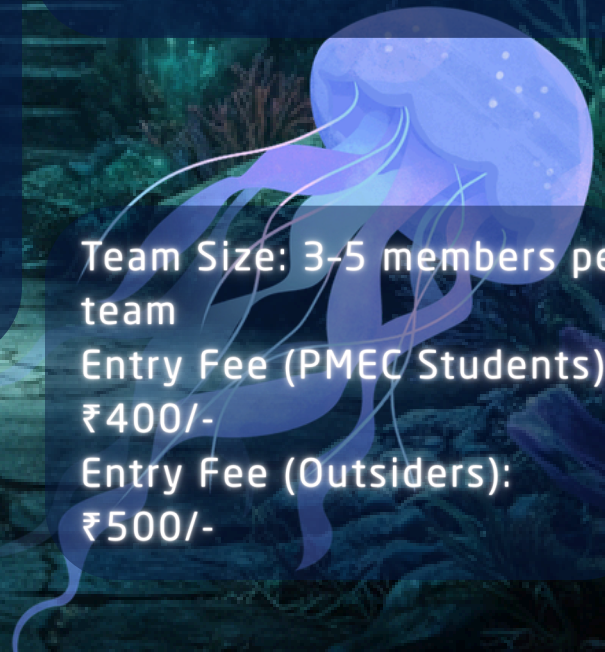

Solutions will be assessed on:

- Innovation and originality
- Technical approach / prototype quality
- Business potential
- Feasibility of execution
- Clarity and strength of final presentation

Team Size: 3-5 members per team

Entry Fee (PMEC Students):
₹400/-

Entry Fee (Outsiders):
₹500/-
